

ATTENTION: DHC GOES LIVE!

On June 1, 2010, the practitioners and staff at the Digestive Health Clinic will implement Phase I of an electronic medical record (EMR) system. Phase II is scheduled for January 17, 2011.

In addition, we will be requesting updated information and a photo from our patients to place in our EMR system.

Our commitment to patients is to provide the highest quality of healthcare services possible during this implementation period. Thank you for your patience.
